

Ferrite Absorber Tile (FA-100)

Description :

Ferrite Absorber Tile (FA-100) is a sintered ferrite with square tile shape. The dimension is 100x100mm and thickness are 5.5 / 6.3 / 6.7mm with a 10mm hole, can be screwed on the wall easily. The common application is for EMC Anechoic Chambers to provide excellent electromagnetic absorption performance in the VHF-UHF bands.

RoHS 2.0
2011/65/EU

(7x3,8x3,6m EMC Anechoic Chamber)

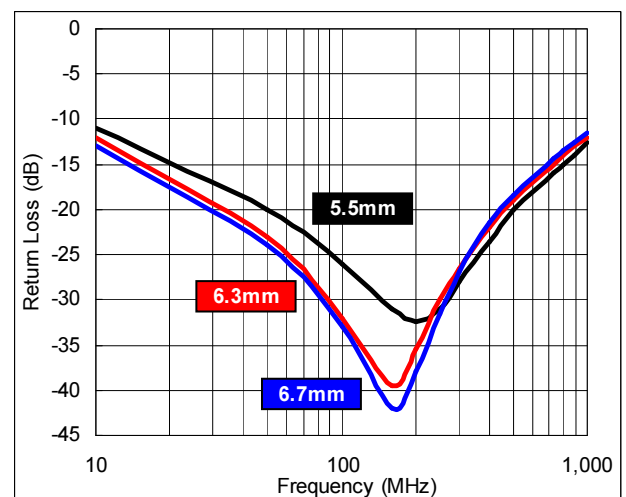

Features :

- An electromagnetic absorbing material
- Non flammable
- Short construction period
- No physical degradation through years
- Ultra thin

Applications :

- EMC Anechoic chambers
- Prevent TV ghost

Reflective Attenuation - Frequency :
