

SAFE-5

Counter Cellular
Eavesdropping Safe box

COUNTERMEASURES

SAFE-5 is counter cellular eavesdropping safe box for up to 5 smartphones intended for protection of data and acoustic information from eavesdropping via cellular networks and pier-to-pier communication over Bluetooth and WiFi channels as well as from covert activation of audio recorder on a mobile phone.

Coming in an elegant wooden case, Safe-5 is a must-have solution for board rooms and executive offices or any other setting where the prevention of a leakage of a sensitive information is a factor, such as command and control centres, research labs, workgroups, etc.

FEATURES

ULTIMATE TRIPPLE PROTECTION

Shielded body blocks electromagnetic radiation, thereby preventing stored mobile devices from communication with cell towers and/or devices (e.g. smart watches, other phones, etc.).

Switchable ultrasound and white noise generators for each cell provide the masking of audio and make speech incomprehensible.

Built-in WiFi and Bluetooth jammer (optional) prevents unauthorized communication between mobile devices placed inside the unit.

HIGH AUTONOMY

Up to 36 hours of operation on a built-in battery.

ELEGANT DESIGN

Complete protection in a solid wood exterior.

GENERAL SPECIFICATIONS

Number of protective cells:	5
Cell size:	170 x 80 x 18 mm
Noise level at the location of phone's mic, not less than:	110 dB
Effective noise spectrum for ultra-sound protection:	22 – 26 kHz
Effective noise spectrum for acoustic protection:	200 – 12,000 kHz
Residual word intelligibility not more than:	10%
Power:	Built-in Li-ion battery 10400 mAh
Continuous running time:	36 hours
Charging time 0 to 100%:	5 hours max
Dimensions, weight:	260x182x120 mm, 2.62 kg
