CUSTOMER HAPPINESS PROMISE

We aim to provide an amazing experience and quality testers that last a long time. If you're not satisfied with your tester, return it within 45 days for a full refund. Calibrate annually with us, or one of our authorized partners, and we'll extend your warranty an additional year for the service life of your tester, and at least five years after discontinuation. If it breaks during that time, we promise to fix it for free (unless abuse or excessive damage is present). When your tester reaches the end of its service life, we'll responsibly recycle it and give you a discount on a replacement.

*Annual calibration and inspection must be made in each successive year starting one year after the original purchase date in order to remain eligible for extended warranty coverage beyond the standard warranty period (five years).

5 YEAR WARRANTY

Your new tester is warranted to be free from defects in workmanship and material for a period of (5) years from date of shipment.

**5 year warranty is valid on any model purchased in 2021 or after.

ONGOING SUPPORT

We work to provide the best service and support in the industry. With decades of industry experience we are the pros you can trust to help you be compliant to NRTL standards. We'll work closely with you to help you achieve your goals. We've built a worldwide network of knowledgable partners, so you're covered no matter where you are.

A HISTORY OF INNOVATION

1936 Associated Research was founded.

1939 We introduced the first battery operated Megohmmeter, the Vibrotest, in the United States.

1966 We commenced the first Cable Testing/Fault Location school known as ARU. ARU continued for over 25 years.

1993 We introduced the first complete family of microprocessor-controlled electrical safety instruments.

1995 We developed the first multi-function electrical safety compliance analyzer.

1997 We released the first electrical safety instrument with a built-in multiplexer for multi-point testing.

1999 We introduced Autoware, the first software package for automated instrument control, in the EST industry.

2001 We released our patented safety feature, SmartGFI®, to provide our customers with maximum operator protection during high voltage testing.

2012 We launched the first electrical safety compliance analyzer with a built-in AC power source.

2013 We developed the first mobile app in the electrical safety testing industry.

2017 We launched the Applications Consulting program.

2020 We Introduced Withstand®, a Software as a Service (SaaS) platform, that is a cloud storage of your tests and data in one platform.

2021 Associated Research joins the IKONIX family to become and IKONIX Brand.

2023 Ikonix globalizes it's product portfolio.

MedTEST is the most comprehensive Electrical Safety Compliance test system in the industry designed exclusively for medical applications. Customize it to meet your specific medical safety testing needs in order to comply with standards such as UL60601, IEC60601-1, EN60601-1, UL2601, and IEC601-1. See page 24 for more details.

Hypot®

Production Line Hipot Testing at its Finest

Our Hypot® Series raises the bar for production line Hipot testing. Improve traceability with onboard data storage and easily transfer test result data and test settings via convenient front panel USB. Take the guesswork out of your production line with the direct barcode connection to quickly associate products with pre-programmed test files. We've included advanced features like improved security and a touch screen interface that provides custom pop-up prompts displayed before each test step. We've dramatically reduced the weight and footprint of the Hypot® Series to make safety compliance a less strenuous ordeal. Quickly interconnect with the HYAMP® Series to form a complete safety compliance system.

Why We Use Counts
Associated Research publishes some specifications using "counts" which allows us to provide a better indication of the instrument's capabilities across measurement ranges. A count refers to the lowest resolution of the display for a given measurement range. For example, if the resolution for voltage is 1V then 2 counts = 2 V.

Specifications subject to change without notice.

HypotULTRA®

The Most Flexible and Feature-Rich Automated Dielectric Analyzer Available

Our HypotULTRA® models provide all the tools you need to modernize your production line with best-in-class 4-in-1 test capability and a slim 2U design. We've added 40A AC Ground Bond test capability to HypotULTRA's already impressive feature list for manufacturers that aim to adopt best testing practices without sacrificing productivity. Whether you're looking to improve traceability with onboard data storage, increase efficiency with our intuitive touch screen interface and direct barcode scanner connection, or automate with a variety of communication interfaces, HypotULTRA was designed to take your production line to the next level.

OMNIA® II

The Most Advanced Electrical Safety Compliance Analyzer in the Industry

Our OMNIA® II Series is a complete line of multi-function electrical safety compliance analyzers designed to satisfy even the most demanding application requirements. We've included exclusive productivity-enhancing features and the latest in safety technology to make this product line the envy of the industry. With 6 models to choose from, a multi-language menu system and a variety of automation interfaces available, the OMNIA® II is ready for global deployment.

Why We Use Counts
Associated Research publishes some specifications using "counts" which allows us to provide a better indication of the instrument's capabilities across measurement ranges. A count refers to the lowest resolution of the display for a given measurement range. For example, if the resolution for voltage is 1V then 2 counts = 2 V.

Specifications subject to change without notice.

HYAMP®

The Industry Leading Production Line Ground Bond Instrument

Our HYAMP® Series provides manufacturers with data-driven results and greater test flexibility required in today's complex test environment. Quickly collect test data and test settings from the convenient front panel USB port onto a standard USB flash drive. Use the front panel barcode connection to associate products with preprogrammed test files. Test with greater flexibility by performing either AC Ground Bond or DC Ground Bond at a maximum of 40 A of current. The HYAMP® features a drastically reduced weight and footprint making it the ideal lightweight Ground Bond solution for laboratory and production line testing applications. Easily interconnect with the Hypot® Series to form a complete safety compliance system.

SC6540

The Patented Multiplexer that Revolutionized Production Line and Laboratory Electrical Safety Compliance Testing

Our patented SC6540 multiplexer pioneered the largest productivity improvement in the electrical safety compliance industry in years. With up to 16 independent high voltage or high current channels in a convenient 2U design, the SC6540 can be customized in 10 different configurations for multi-point Hipot, Ground Bond, Insulation Resistance, and Leakage Current testing. Configure the SC6540 according to your needs, and interface with your OMNIA® II, HypotULTRA® or LINECHEK® II instrument to improve production line throughput or expand lab testing capability. Operate from the front panel of your AR instrument or utilize a variety of automation interfaces for direct PC control.

MODULAR MULTIPLEXER SPECIFICATIONS	
Input (Main only)	115 VAC (± 10%), 50/60 Hz, single phase 230 VAC (± 10%), 50/60 Hz, single phase User selectable
Fuse (Main only)	250 V/2 A/fast-blow
PC Control (Main only)	Standard: USB, RS-232 Optional: Ethernet, GPIB
Multiplexer Control	Main: One Multiplexer bus output controls, up to 4 additional secondaries Secondary: One output and one input
Maximum HV Rating	5 kV AC and DC
Maximum HC Rating	40 A
Number of Possible Channels	8 or 16
HV Output	100' reel HV cable rated for up to 30 kV Terminations with 8 HV connectors
GND Output	20 terminals provided, to accept 10/12 AWG Terminations hook-up wire (user supplied wire)
Temperature	32˚ – 104˚ F (0˚ – 40˚ C)
Humidity	0 – 80%
Altitude	6,560 ft. (2,000 m)
Mechanical	2U with tilt-up front feet
Dimensions (W x H x D)	17" x 4.07" x 12.96" (432 x 103 x 329 mm)
Weight	Main: 20.05 lbs. max. (9.09 kg) (with 2 high voltage modules) Secondary: 15.45 lbs. max. (7.01 kg) (with 2 high voltage modules)

CONFIGURATIONS

The modular design can be customize to fit your application. In addition to main or secondary control, the SC6540 can be set up in the following configurations: 8 or 16 high voltage channels, 8 or 16 high current channels, and 8 high voltage channels and/or 8 high current channels. Refer to the images for details.

The different configurations (shown below) are indicated by the following alpha designators

M – Main Multiplexer
H – 8 High Voltage Channels
HH – 16 High Voltage Channels
G – 8 Ground Bond Channels
GG – 16 Ground Bond Channels
N – Empty Module
S – Secondary

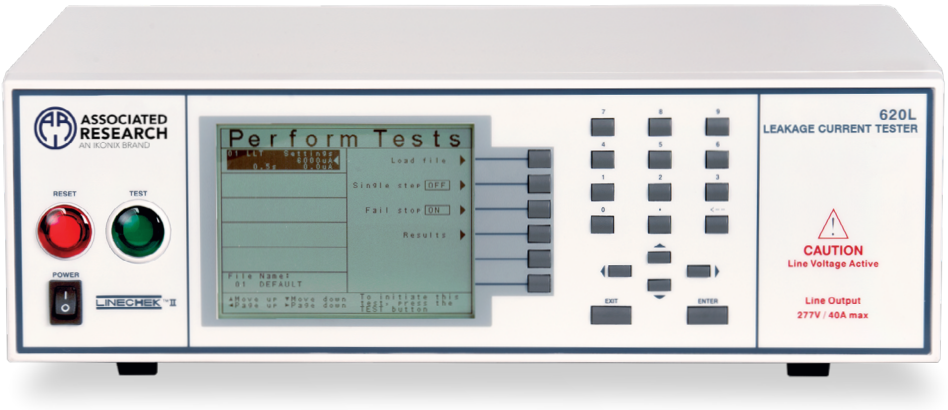
LINECHEK® II

The Fully Automated Leakage Current Instrument that Changed the Industry

Our LINECHEK® II model 620L provides 7 measuring devices (MD's) compliant with international certification bodies as well as a convenient switching network to simulate all 8 required fault conditions, everything you need for full Leakage Current compliance. Utilize the intuitive user interface or control via a PC for more advanced automated applications that require data storage and analysis. The 620L handles up to 40 A of continuous current and can be interfaced to an SC6540 modular multiplexer for multi-point testing. Interconnect the 620L to an OMNIA® II instrument to form a complete electrical safety compliance testing system.



AVAILABLE INTERFACES

- **USB**
- **RS-232**
- **Ethernet** (Optional)
- **GPIB** (Optional)

SAFETY & PRODUCTIVITY FEATURES

- **Prompt & Hold** — Provides alerts & instructions between tests
- **Remote Safety Interlock** — Easily disable HV output
- **Active Link®** — Continuous power during test steps
- **PLC Remote** — Basic PLC relay control
- **Modular Multiplexer** — Compatible with SC6540 multiplexers
- **Interconnection** — Interconnect with OMNIA® II or HypotULTRA® to form a complete test system
- **Cal-Alert®** — Tracks and alerts for calibration
- **WithStand®** — Automation Software

Why We Use Counts
Associated Research publishes some specifications using "counts" which allows us to provide a better indication of the instrument's capabilities across measurement ranges. A count refers to the lowest resolution of the display for a given measurement range. For example, if the resolution for voltage is 1V then 2 counts = 2 V.

MedTEST

A Complete Electrical Safety Testing System that Satisfies the Most Demanding Medical Compliance Requirements

Our MedTEST system can be designed to provide a complete test solution for medical device manufacturers in need of conforming to IEC 60601-1 3rd Edition Standard. Customize your MedTEST system to satisfy your individual testing requirements including Hipot, Ground Bond, Insulation Resistance, Functional Run and leakage current testing for all B, BF and CF type applied parts including Mains on Applied Parts (MOAP) tests. Up to 40 A of continuous DUT current combined with our Active Link® technology reduces overall test time and integration with our SC6540 modular multiplexer allows for multi-point sequential testing without the need to change test leads. Get the most from your test system by utilizing our WithStand® software for maximum productivity-enhancing benefits.

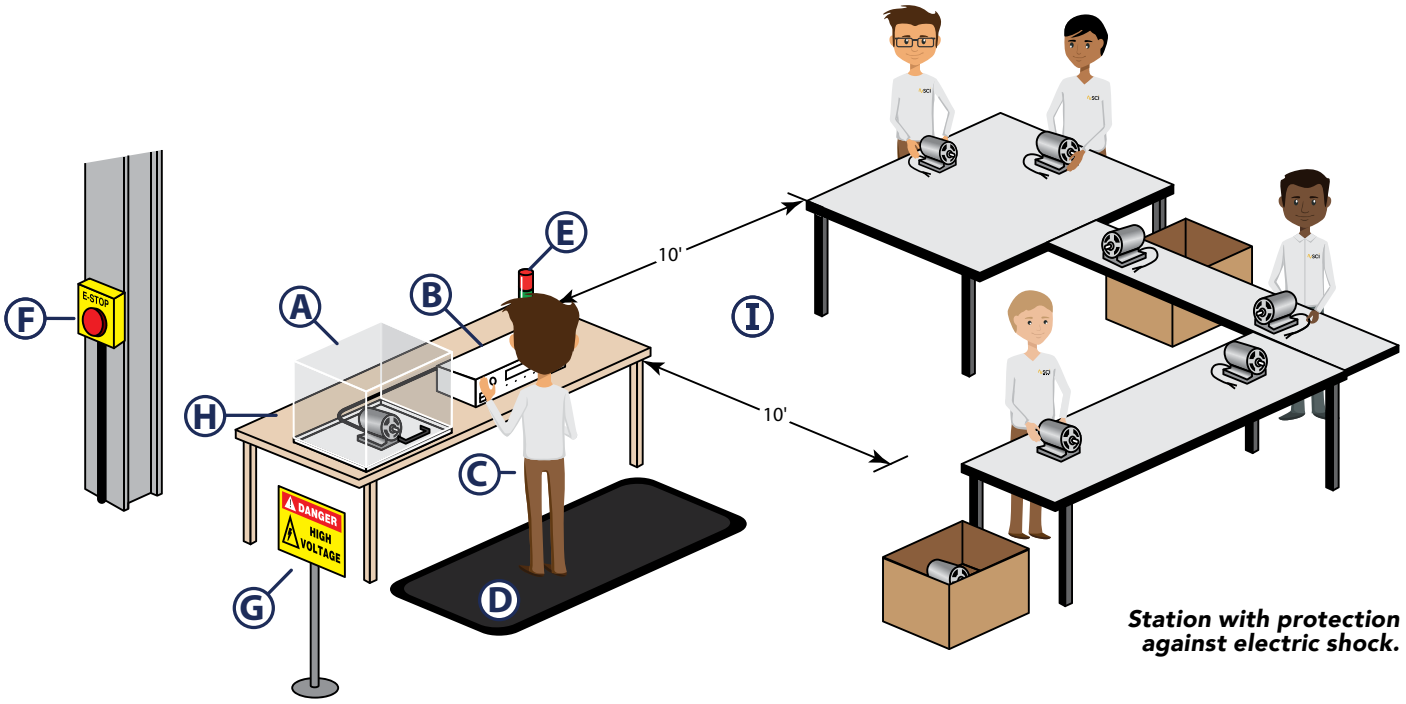
SETTING UP A SAFE WORKSTATION

Setting up a safe and secure workstation is one of the best ways to protect your test operators. You can setup test stations with or without direct protection depending on your requirements.



Station with protection against electric shock.

	Description
A	DUT Safety Enclosure - This is wired to the Hipot tester's Remote Safety Interlock. This protects you from touching the DUT while a test is in progress. When you open the enclosure door, it will immediately disable the instrument's high voltage output.
B	Hipot Tester – Performs test on the DUT
C	Test Operator
D	High Voltage Insulation Mat – This isolates you from ground which provides an additional means of protection when operating high voltage equipment.
E	Signal Tower Light – Gives an indication as to the status of the testing area. A green light indicates the Hipot instrument is not outputting high voltage and the test area is safe. A red light indicates that the Hipot instrument is active and to stay clear of the test area.
F	Emergency Stop Button – An E-stop button is located on the perimeter of the test area. In the event of an emergency, someone outside the test area can hit the E-Stop button to immediately cut off power to the entire test station.
G	Warning Signs – Mark the testing area with clearly posted signs that read: DANGER-HIGH VOLTAGE TEST AREA. AUTHORIZED PERSONNEL ONLY.
H	Non-Conductive Work Bench – Only use a work bench made of non-conductive material such as plastic or wood. This ensures no stray leakage current could flow through you during a test.
I	NEC (National Electric Code) and NFPA (National Fire Protection Agency) stipulate that any unqualified workers shall not come within 10 feet of an EXPOSED energized circuit.

DUT Enclosure Wood Frame with Foam Interior 39067

Protect your operator from electric shock by enclosing your DUT. Our enclosures automatically disable the instrument's output when the enclosure door is opened. Our DUT Enclosures are designed to protect the operator from electric shock during testing. Interface an enclosure with our Remote Safety Interlock feature to automatically disable the instrument's output when the enclosure door is opened.

Dual Palm Remote Switch DPR-01

Prevent your operator from touching a DUT as their hands must stay on the test switches to continue to run a test.

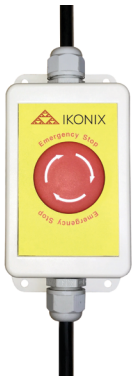
Remote Test Box w/LED Indicators RTB-02

CE

Helps maintain a safe distance between the operator and test instrument when starting and restarting a test. Compatible with all models except SC6540.

E-Stop ESTOP

Immediately stop the flow of electric current to your instrument when the E-Stop is triggered. The E-Stop provides the safest and fastest way for a rescuer to save an operator from injury.



Test Verification Box TVB-2

The TVB-2 is a go/no-go daily test verification box designed to ensure that the failure detectors of an Associated Research electrical safety testing instrument are functioning properly. We designed the TVB-2 to verify Hipot, Insulation Resistance, Ground Bond, and Ground Continuity test functionality. If you perform daily verifications on your testing equipment, then the TVB-2 is an ideal solution. An accessory cord is available to customers who prefer to verify their test instrument using an adapter box.

TVB-2 Accessory Cord 39514

Accessory line cord for the TVB-2 allows convenient connection to a standard adapter box.

Leakage Current Verification Box LVB-2

Verify the failure detectors of your Associated Research Leakage Current Test instrument are functioning properly with this go/no-go load box.

Signal Tower Light 24V 40417

Our Signal tower light gives operators a visual indication of the status of the testing area. A green light indicates the Hipot tester is not outputting high voltage and the test area is safe. A red light indicates that the Hipot tester is active and to stay clear of the test area. Compatible with OMNIA® II Series, HypotULTRA® Series, Hypot® Series, HYAMP® Series, HypotMAX® Series, and LINECHECK II (620L).

	Production	400 – 2500 VAC	5-30 mA	1 s	≥ 10 A	≤ 12 V	0.1 – 0.2 Ω	No time specified
UL 60335-1 Household Electrical Appliances	**Performance**	500V – 2400 VAC x rated V + 2400 VAC	No Breakdown	60 s	40 A	≤ 6.5 V	≤ 0.5 Ω	120 s
	Production	400 – 2500 VAC	5-30 mA	1 s	40 A	≤ 12 V	0.1 – 0.2 Ω	No time specified
IEC 60598-1 Luminaires	**Performance**	500 – 4 x rated V + 2000 VAC	No Breakdown	60 s	≥ 10 A	≤ 12 V	≤ 0.5 Ω	60 s
	Production	Not Specified – Responsibility of Manufacturer						
UL 1598 Luminaires	**Performance**	1000 VAC – 1000 VAC x 2 x rated V	No Breakdown	60 s	30 A	≤ 4 V	≤ 0.1 Ω	120 s
	Production	1200 VAC		1 s	Continuity		≤ 0.1 Ω	Continuity
IEC/UL 61010-1 & CSA 22.2 No. 61010-1 Laboratory Control Test & Measurement Equipment	**Performance**	840 – 11940 VAC or 1200 – 7500 VDC	No Breakdown	5 – 60 s	25 or 30 A	≤ 10 V or ≤ 12 V	≤ 0.1 Ω or < 4 V 0.133 Ω	60 or 120 s
	Production			5 s max ramp up 2 s dwell	Continuity			
EN 60204-1 Electrical Equipment of Machines	**Performance**	2 x rated V or 1000 VAC	No Breakdown	1 s	0.2 – 10 A	≤ 24 V	Refer to Section 18.2.2	No time specified
	Production	Not Specified – Responsibility of Manufacturer						
UL 2202 Electric Vehicle Charging System Equipment	**Performance**	500 VAC or 1000 VAC + 2 x rated V	No Breakdown	60 s	≤ 60 A	≤ 12 V	Continuity	120 – 240 s
	Production	1000 – 1700 VAC + 3.4 x rated V		60 or 1 s	Continuity			
IEC 61851-1 Electric Vehicle Conductive Charging System	**Performance**	1200 VAC + rated V or DC Equivalent	No Breakdown	60 s	Continuity			
	Production	Not Specified – Responsibility of Manufacturer						
IEC 62368-1 Audi/Video, Information & Communication Technology Equipment	**Performance**	1000 – 3000 VAC or 1414 – 4242 VDC	No Breakdown	60 s	≤ 40 A	≤ 12 V	≤ 0.1 Ω	60 s
	Production			1 – 6 s	Continuity			

*As a result of performing risk analysis, many medical device manufacturers are performing leakage tests as part of 100% production line testing.
