autoware®

Electrical Safety Compliance Testing Software
### The only stand-alone software that captures, stores and analyzes test results

Autoware S9870 is used in tandem with Associated Research's QUADCHEK II, HypotMAX, HypotULTRA III, HypotULTRA II, LINECHEK and RUNCHEK series of instruments. Autoware S8456 is used in tandem with Associated Resarch's OMNIA and LINECHEK II series.

Autoware helps to automate the testing procedure and increases the efficiency of a production line. It allows for barcode scanning of serial and model numbers of the Device Under Test as well as providing data logging and advanced report printing. Autoware also improves efficiency with the ability to remotely program instruments, and automatic loading of test files. It also provides the backup assurance manufacturers need to prove their equipment meets electrical safety requirements established by safety agencies worldwide.

Features and Benefits

- Installs quickly & easily on any Windows based system

- Automatic setup eliminates operator error

- Easily import test data into any spreadsheet, word processing or database program

- Choice of Ethernet, USB/RS-232 or GPIB communication interfaces

autoware®-MT

Automated Multi-Test Station Software
Record test data from several network connected instruments in one central location

Autoware-MT is an Associated Research, Inc test software program that allows a user to monitor and record test data from up to 20 network connected OMNIA 8100 Series instruments. Through the use of an Ethernet interface, it allows for logging and statistical analysis of test result information collected from multiple instruments. Once the software is installed and running it polls each of the connected instruments and downloads test results after each test routine is completed.

We have local sales offices throughout the world to serve you more efficiently.
