Short description

The PA 203 preamplifier is designed for the amplification of measuring signals, e.g. weak signals of near-field probes with high resolution. The PA 203 is connected to the 50 ohm input of a spectrum analyzer or an oscilloscope and is supplied by the wall-plug transformer. With the correct cable a near-field probe can be connected to the input of the preamplifier. Either a 50 ohm BNC (PA 203 BNC) or SMA connector (PA 203 SMA) is used for the input and the output of PA 203.

Technical parameters

Frequency range 100 kHz - 3 GHz

Amplification 20 dB

Weight 400 g

Scope of delivery

- 1x [PA 203 BNC, Preamplifier 100 kHz to 3 GHz](#)
- 1x NT FRI EU, Power Supply Unit
- 1x A5 case, System case
